RULES & TURN

Pipeline
Follow stage order – never backwards. Advance with next-stage cards. A stage stays open until a player advances; then that stage closes.

Your turn

1. Play valid cards in sequence (as many as you can)
2. Earn IP for each card
3. When stuck, draw 1 card
4. End turn (clockwise)

Example Pipeline

Data Collection
↓
Data Preparation
↓
Feature Engineering
↓
Model Selection
↓
Model Training
↓
Model Evaluation
↓
Deployment

SETUP & IP

1. Draw 1 Objective – place face-up
2. Place matching Milestone beside it
3. Shuffle Engineer Deck (210 cards)
4. Deal the same number of cards to each player
5. Players agree on the same starting hand size. Recommended: 4–7 cards.
6. Draw pile face down · All start at 0 IP

Innovation Points

Data Collection	**+10**
Data Preparation	**+10**
Feature Engineering	**+15**
Model Selection	**+20**
Model Training	**+15**
Model Evaluation	**+15**
Deployment	**+25**
Milestone	**+30**

Score Tracker
Track IP using the player score tracker.
If a player exceeds 100 IP, continue from 0 and add 100.

Shared pipeline – all players build together.

WIN & CHALLENGES

Win: Complete the AI system.
Highest IP after Deployment wins.

Unique: A card already in the pipeline cannot be played again.

CHALLENGE!

- Duplicate card already in pipeline
- Invalid stage progression

Failed challenge = lose next turn.
